

AAPT IPVPN

AN AAPT DATA & NETWORKING SOLUTION

PRODUCT OVERVIEW

Rapidly share voice, video and data between staff, offices and customers without managing your own network. With AAPT IPVPN, you can integrate all your requirements into one high speed, fully-managed virtual private network (VPN) that lets you quickly share all sorts of information, anywhere in your company network, or by remote access.

What is your business looking for?

- A high bandwidth, private network to connect all your offices in Australia and New Zealand
- Relief from the cost and time burden of managing your own network
- To centralise systems between disparate offices in Australia and New Zealand and enable free internal calls
- A robust network for business-critical applications with service level agreements
- Smooth running of software applications such as VoIP, Citrix, SAP or video conferencing
- A way to provide customers with secure 'point-to-point' connections

How will your business benefit?

One simpler solution

Centrally manage company-wide applications such as voice over IP, SAP, Citrix, video conferencing, internet, remote access and more.

Centralise IT to save time and money

A single network means you can consolidate application servers for faster, simpler administration.

Flexible and scalable

It is quick and simple to upgrade processes, add or delete connections and manage users.

A platform for growth

Strengthen your business relationships with a solid platform on which to build your extranets and e-business strategies.

Performance you can rely on

With clearly defined service level agreements, you'll know exactly what performance and availability you can expect.

One network to share voice, video, files, multimedia and business applications company-wide. And, it can all be accessed remotely!

Key features

AAPT IPVPN is a fast and effective way to provide a central private network across your organisation by connecting separate local area networks (LANs).

It is a premium quality, high bandwidth solution that supports the full range of voice, video and data applications – all of which can be accessed from anywhere in the network and remotely.

Any-to-any connectivity

All sites within the network can connect quickly including secure remote access

Scalability

As your needs change, adding and removing connections to the network is simple

Prioritise services

Prioritise bandwidth for mission-critical applications over less critical ones so your key business tools run at optimum speed

Fully managed

Clear service level agreements define performance and availability standards

Low capital investment

We can provide and manage customer premises equipment that is needed to deliver the solution

Online reporting

View availability, core latency, class of service

Trans Tasman

Create one network spanning Australia and New Zealand

Free internal calls

By making calls over the IPVPN network between sites in Australia and New Zealand you can avoid per minute rates and only pay for calls outside your network

A fast, reliable and cost-effective network for your changing business communications needs.

We're in the business business

Since 1991, AAPT Business Solutions has delivered big results for businesses just like yours with our suite of voice, internet, data and mobile solutions. With more flexibility, more personal service and simpler communication, you spend more time doing business and less time chasing telcos. As part of the Telecom group of companies and one of the few Australian telcos with its own national network, AAPT offers you the reliability and value only possible through a tier one carrier. It's the best of both worlds, proven technology with a serious focus on service.
