

AAPT ONE OFFICE

AN AAPT DATA & NETWORKING SOLUTION

PRODUCT OVERVIEW

Easily share voice, video and data between offices, colleagues, customers and partners. With IP-based AAPT One Office, you can integrate your communications requirements into one high speed, fully-managed virtual private network (VPN). That means you can quickly share all sorts of information, anywhere in your company network.

What is your business looking for?

- A simple way to bring your offices together – even across the Tasman
- One IP solution for voice, data, video conferencing, online training web applications and more
- To maximise the performance and speed of your business applications
- Free internal calls across your multiple offices in Australia and New Zealand
- To free up your in-house IT management resources
- To enable 'business as usual' 24 hours a day

One network to share voice, video, files, multimedia and business applications company-wide. And, it can all be accessed remotely!

How will your business benefit?

One simpler solution

Centrally manage company-wide applications such as VoIP, SAP, Citrix, video conferencing, internet, remote access and more.

Centralise IT to save time and money

A single network means you can consolidate application servers for faster, simpler administration.

A platform for growth

Strengthen your business relationships with a solid platform on which to build your extranets and e-business strategies.

Performance you can rely on

With clearly defined service level agreements, you'll know exactly what performance and availability you can expect.

Free inter-office calls

When multiple sites in Australia and New Zealand are connected, calls between offices across the network are free.

Extremely competitive rates

Access low call rates and line rental costs and save with AAPT's volume and term discounts.

Key features

One Office by AAPT is a fast and effective way to provide a central private network across your organisation by connecting separate local area networks (LANs).

It is a premium quality, high bandwidth IP solution that supports the full range of voice, video and data applications – all of which can be accessed from anywhere in the network and remotely.

Any-to-any connectivity

All sites within the network can connect quickly including secure remote access

Scalability

As your needs change, adding and removing connections to the network is simple

Priority classes

Allocate available bandwidth to applications according to their importance

Fully managed

Clear service level agreements define performance and availability standards

Low capital investment

We provide and manage all equipment needed to deliver the solution

Converged voice and VPN

Save on line rental and IT support costs

Detailed reporting

View availability, core latency, class of service and more

Online billing

Control costs, simplify administration

Trans Tasman

Create one network spanning Australia and New Zealand

A fast, reliable and cost-effective network for your changing business communications needs.

We're in the business business

Since 1991, AAPT Business Solutions has delivered big results for businesses just like yours with our suite of voice, internet, data and mobile solutions. With more flexibility, more personal service and simpler communication, you spend more time doing business and less time chasing telcos. As part of the Telecom group of companies and one of the few Australian telcos with its own national network, AAPT offers you the reliability and value only possible through a tier one carrier. It's the best of both worlds, proven technology with a serious focus on service.
